An annual series of study days which aim to help clinicians update and improve their approach to the diagnosis and management of neurological problems in children.

Each day focuses on a different range of subjects – delegates can attend the whole course or individual days.

The course uses a combination of lectures, case presentations, slides and videos.

Emphasis is on the best current approach to the practical management of a selection of common problems.

Who should attend?
The course is intended for Consultant Paediatricians, Paediatricians in Training and Health Professionals involved in the management of children with neurological disorders.
